

Pandora Battery

A friend of mine approached me the other day saying that he's selling Pandora Batteries on eBay for a neat profit. My first question to him was: What the heck is a Pandora Battery and what is it for?!

He explained: It's a battery for PlayStation Portable: the one you use to unbrick a bricked PSP.

Then I asked: WTF is unbricking a bricked PSP? (Sorry, but I swear a lot when I talk to him lol)

As you can see, when you upgrade or downgrade or even modding your PSP, you have a chance of rendering the PSP useless – meaning that you can't even turn it on which also practically means that you can use it as a brick and throw it on angry stray dogs.

By using the Pandora Battery and PSP Magic Memory Stick you can restore your PSP and make it work again.

Here's a video on how to unbrick your PSP:
