

Good Online Business Requires Excellent Web Hosting Services

Over the years I have managed to grow my online business from a single domain to up to 50 domains which comprise of unique domain names that I have registered online.

One advice though – if you are serious in venturing into an online business, I’d recommend you to seriously invest in a good web hosting company.

Why?

I made a mistake in the past whereby I subscribed to a cheap web hosting company offering marginal service quality. I did plan on migrating my entire site to a new web host – but later as my site grew exponentially, I just couldn’t afford to loose precious time migrating my data.

As you can see, ‘Time equals to Money’.

So what should you seek when looking for a web host? Here are a few pointers to help you:

1. Reliability – meaning that their servers should have excellent up-time and your websites should be accessible 24/7
2. Add multiple domains – you should be able to add an unlimited number of domains into your web host
3. Ample bandwidth and web space – adding and installing applications on a huge number of domains would consume a high amount of bandwidth and web space. Make sure your web host provides you with a fair amount of web space and bandwidth
4. Good support – it’s inevitable that you will encounter problems while using your web host. It’s important that your web host provides you with excellent tech support for your site – better if its 24/7 live support
5. cPanel – this is one of the most important feature that a web host must have!
6. Affordable web hosting factor – all these goodies must be available at an affordable price

Well, given into considerations with all the factors mentioned above, you should take a look at what IMHosted.com has to offer.

For \$6.95 you’ll get

1. 2,500 GB web space
2. 20,000 GB bandwidth
3. Host unlimited domains AND FREE domain for life
4. 99.998% uptime
5. cPanel and free open source software installer (Fantastico) like WordPress and Joomla
6. Excellent 24/7 live support

After all, IMHosted.com has received applauding awards by prestigious web portals such as Top15 Host by HostReview.com, Editor’s Choice from FindMyHost.com, CNET User Recommended and many more – total awards amounted to a cool 28 awards.

Nevertheless, I believe that with such competitive pricing being offered by this web host, I’m sure that it’s definitely worth your time paying a visit to their web portal and take a look at their web hosting offers.
