

List of Free Online Directories

Search Engine Ranking or rather Search Engine Positioning is the Holy Grail for any successful online business. Google and Yahoo have managed to position themselves on one of the busiest traffic junctions in the world – the World Wide Web. Anyone that could ‘entice’ them to place your websites on the top ten lists whenever any users around the world perform a search on specific keywords would definitely be smiling away to the bank every single month.

Well, one sure way to get better Search Engine Ranking is by building tons of backlinks that contains specific anchor text and link.

For example,

Anchor Text: Michael Woo
Link: <http://michaelwoo.net>

However, it’s pretty hard to ‘force’ your keywords on one’s blog for free – usually I would simply delete these comments on my site (Or you could just pay me some money to write a sponsored post :))

On the other hand, another easy way to build backlinks is to submit your sites to online web directories. Although it might take some time for them to approve your link, it’s still a definite way to gain a link to your site.

If you are looking for some FREE web directories to submit your links, here’s a list for you as starters:

(This list was UPDATED on September 14th, 2008)

Total Uniques per Day from ALL Established Directories: 6,800 (200,000 per month)
